PepsiCo is pleased to report that the equipment referenced below has passed the established criteria and is now authorized for PepsiCo trademark usage, subject to the conditions outlined below.

This Authorization is not to be construed as a contract for the purchase of marketing equipment, nor does it relieve your company of the responsibility to supply quality equipment at all times. This Authorization is only for the model approved in this notice and authorizes you to print literature and display this product with PepsiCo trademark in authorized markets. Periodic re-testing will be conducted to ensure continued compliance to our specifications. Failure to maintain these specifications and comply with the terms below will be grounds for revoking Authorization. PepsiCo reserves the right to withdraw this Authorization without liability, with or without cause, upon written notice.

Equipment Description: Internal Device for Energy Consumption Management in Vending Machine	Model (s): VM2IQ
Effective Date: July 1, 2008	Expiration Date: July 1, 2009
Authorized Market(s): USA, Canada and Mexico	
Approved for the following conditions: For use on approved vending machines located indoors or outdoors	
Approved Electrical Rating: 115V/60Hz	
PepsiCo Test Reference #: V-USAT-Internal Vending Miser, FMI report dated March 25, 2005	

Comments:

- Approved only for installation on Magnum-style and HVV vending machines manufactured prior to 2004.
- VM2iQ is not approved for Energy Star-certified models manufactured since 2004 due to limited energy efficiency benefit.
