Subject: RE: VendingMiser Installation

David,

Thanks for assisting in the installation of our VendingMisers here at Naval Station Everett. The installation was simple, quick, and easy to learn. After one month, we surveyed our ten installed VendingMisers. Not one location had noticed any change in the functioning of the machines. Beverages were still always cold, and most users were adamant that the lights never turned off on their machine. However, independent verification proved the machines, lights included, did in fact turn off during periods of non-use. Our thanks again for a seamless integration of the VendingMisers into our current vending facilities. We look forward to installing more VendingMisers in the future.
