Subject: RE: VendingMisers at Other Navy Facilities

David,

In our PWC JAX headquarters Bldg. 902 (at NAS JAX) we have had a Vending Miser installed for over a year and had no complaints from vending consumers/building occupants or the vending contractor about the VendingMiser. I am sure that if it was adversely affecting sales that we would be notified and they have not done so. The VendingMiser has worked well in achieving electrical savings that we have installed 2 more in the same building, as well as 2 in an additional facility.
